

MEMORANDUM

To: All LiUNA Laborers

From: LiUNA Chicagoland Laborers' Training & Apprentices Fund

Date: October 4, 2023

Re: CLTAF Training Course and Curriculum Updates – Solar Farm Construction Training

LIUNA Training has designed and developed a Solar Farm Construction Training course for LIUNA members across the United States and Canada. This Solar Farm Training course incorporates both classroom and hands-on training. This 3-day course will provide our members with experience related to commercial Solar Farm construction and Solar Panel Installation. Classroom activities include lessons on electrical hazards, PV module, post and racking installation and more. Hands on activities include site prep, layout and setting the posts, racking system and panels. The Chicagoland Training Fund has acquired PV panels along with a 10-panel racking system that will be built in various configurations during training.

The course will incorporate the use of the LIUNA Training University Suite (LTUS) which allows our instructors to facilitate lessons and participants to experience learning activities through this state-of-the-art virtual platform. Participants that are confirmed into this course should possess strong computer skills.
